

GEETHAA SREE KONERU

ARTIFICIAL INTELLIGENCE AND MACHINE LEARNING ENGINEER

konerugeethaasree@gmail.com ♦ [Linkedin](#) ♦ [Github](#) ♦ [Portfolio](#) ♦ [+91 9705555767](#) ♦ [Certificates](#)

OBJECTIVE

Artificial Intelligence and Machine Learning Engineer with experience in developing and deploying AI applications using Python, TensorFlow, PyTorch, SQL, FastAPI, Docker, and cloud platforms. Experienced in data preprocessing, ML workflows, data pipelines, RAG systems, API development, and AI application deployment. Strong foundation in machine learning, deep learning, neural networks, and data analytics, with experience improving system reliability and performance.

EDUCATION

Bachelor of Artificial Intelligence and Machine Learning November 2021 - May 2025
Usha Rama College of Engineering and Technology 9.18 CGPA
Relevant Coursework: Machine Learning, Deep Learning, Data Analytics, Database Management Systems, Linear Algebra, Probability and Statistics, Calculus

SKILLS

Python, SQL, Pandas, NumPy, NLP, TensorFlow, PyTorch, Scikit-learn, Hugging Face, AWS, GCP, LLMs, RAG, Generative AI, Prompt Engineering, LangChain, Google ADK

EXPERIENCE

AI Agent Development Intern Jun 2025 - Sep 2025
SocioSquares *Remote*

- Developed and tested AI agent workflows using Python, LangChain, and Google ADK, integrating AI services, tools, and workflow components for automated applications.
- Implemented data validation, preprocessing, prompt optimization, and fallback mechanisms to improve AI system reliability and response consistency.
- Analyzed execution logs and traces to identify workflow bottlenecks and latency issues, contributing to a 20% reduction in response time.
- Debugged multi step AI workflows and tool interactions, improving system reliability, error handling, and execution consistency across automation use cases.

Data Science and Data Analytics Intern Nov 2024 - Apr 2025
360DigiTMG *Remote*

- Performed data preprocessing, exploratory data analysis, statistical analysis, and visualization using Python and data science libraries.
- Developed and evaluated machine learning models for predictive analytics using structured datasets.
- Applied data transformation, feature preparation, model evaluation, and performance analysis to derive actionable insights.
- Worked with SQL and Python based analytical workflows for data preparation and reporting.

AI/ML Virtual Intern (AICTE EduSkills) Apr 2024 - Jun 2024
Google for Developers *Remote*

- Applied concepts in Machine Learning, Neural Networks, Deep Learning, TensorFlow, CNNs, and Computer Vision through labs and project work.
- Worked with object detection, TensorFlow Lite, Google ML Kit, and machine learning workflows.
- Developed practical understanding of ML model development and deployment constraints for computer vision applications.

- Completed AWS Academy Cloud Foundations and AWS Academy Machine Learning Foundations.
- Developed foundational knowledge of AWS infrastructure, compute, storage, databases, networking, security, and machine learning workflows.

CERTIFICATIONS

- NPTEL - Introduction to Large Language Models
- NPTEL - Computer Vision and Image Processing
- GUVI - Generative AI
- Google - GCP Analytics (BigQuery, Looker) Color Your Skills Badge
- AICTE - Networking Cloud Virtual Internship
- IIT Hyderabad - Cloud Workshop on Docker

PROJECTS

AI ASSISTED MULTI MARKET PAPER TRADING SYSTEM

Python, Grok API, Alpaca API, FastAPI, Docker, Alpha Vantage API

- Built a modular multi market automation system integrating external financial APIs for equities, crypto, and forex workflows.
- Developed market specific execution engines with configurable risk controls, circuit breakers, position limits, and API usage safeguards.
- Implemented logging, reporting, health monitoring, and Telegram alerts to improve system observability and operational reliability.
- Built and containerized a FastAPI monitoring dashboard with Docker, exposing system health and trading activity through API endpoints.
- Designed the system as a paper only execution environment, separating secrets through environment based configuration and preventing live trading by design.

MALARIA CASES IN INDIA - DATA VISUALIZATION

Power BI, Data Analysis, Data Visualization

- Developed an interactive Power BI dashboard to analyze yearly malaria cases in India and identify trends and patterns across the dataset.
- Transformed and organized extensive malaria data into interactive visualizations to communicate key findings and support data driven analysis.
- Designed dashboards and visual reports to present historical trends and insights in an accessible format.
- Completed the project through AIMER Society, applying practical data analysis and visualization techniques.

CONVERSATIONAL PDF RAG APPLICATION

FastAPI, LangChain, Chroma, Groq, Hugging Face, React

- Built a modular RAG application with a FastAPI backend and React frontend, enabling conversational querying across multiple PDF documents.
- Developed REST APIs for document upload, session based chat, and service health monitoring using FastAPI and Pydantic schemas.
- Implemented LangChain and Chroma RAG orchestration with Groq LLMs and Hugging Face embeddings for document ingestion, retrieval, and response generation.

ACHIEVEMENTS

- Secured First Position in Branch Academics, 2021 - 2025
- 1st Place - Internal SIH 2024, URCE
- 3rd Place - Prompt AI, yoUR Fest 2025, URCE
