

KONERU GEETHAA SREE

EARLY CAREER ARTIFICIAL INTELLIGENCE ENGINEER

konerugeethaasree@gmail.com | [Linkedin](#) | [Github](#) | [Certificates](#) | [Website](#) | +91 9705555767

SUMMARY

Early career AI and Cloud Engineer with experience designing and deploying AI powered agentic systems using LLMs, FastAPI, Docker, and cloud platforms. Experienced in POCs, MVP development, system debugging, and performance optimization for real world AI applications. Strong foundation in customer facing solution building, cloud native services, and repeatable AI workflows.

EDUCATION

B.Tech in Artificial Intelligence and Machine Learning

August 2021 - May 2025

Usha Rama College of Engineering and Technology (JNTUK)

9.18 CGPA

Intermediate MPC (BIEAP)

May 2019 - Jun 2021

Sri Chaitanya Junior College

94.4 %

10th CBSE

Jun 2018 - Apr 2019

Dr K K R Gowtham School

91.2 %

SKILLS

Core Skills: Python, SQL, LLMs & RAG, FastAPI, Docker, GCP, AWS, Git

EXPERIENCE

AI Agent Development Intern - SocioSquares (Remote)

Jun 2025 - Sep 2025

- Architected and tested LLM based agent workflows using LangChain and Google ADK.
- Focused on prompt design and validation to improve response consistency.
- Analyzed logs and traces to identify latency issues, reducing response time by 20%.
- Enhanced internal automation use cases across the development lifecycle.

PROJECTS

Federal RAG Agent

Python, Ollama, Qwen 0.5b, FastAPI

- Developed a document based QA system where responses often failed during batch queries initially.
- Incorporated data validation, retries, and fallback retrieval, which reduced failed runs by 25%.
- Resolved debugging latency issues by checking logs rather than changing models.

Conversational PDF RAG QA

Python, GroqAPI, HuggingFace

- Built a FastAPI service to chat with multiple PDFs.
- Structured the system into ingestion, retrieval, and generation components to support modular deployment.
- Optimized the pipeline, improving response time by 15%.

Crack Detector Web Application

Python, Numpy, OpenCV

- Led a team of 4 to ensure smooth development and deployment.
- Applied image processing techniques (Gaussian blur, edge detection, morphological operations) to enhance crack detection accuracy.

ACHIEVEMENTS AND CERTIFICATIONS

- Silver Medals for academic excellence in AI and ML
- NPTEL - Introduction to Large Language Models (LLMs)
- NPTEL - Computer Vision and Image Processing
- IBM - Apache Spark for Data Engineering and ML
- Google - GCP Analytics (BigQuery, Looker) Color Your Skills Badge
